Responsible Person:	National Manager Cold Chain Protocols and Standards (Bernard Henning)	
Approver:	General Manager Coastal (Vijan Chetty)	
Department:	Operations - Cold Chain	

For all discrepancies found during container loading, checks that does not warrant a rejection at time of loading, the Q136 form must be completed but this exclude the following two conditions:

- Cold Treatment Containers
- Incorrect set points where a Generator Unit is a requirement during transport

The loading point must complete the following form and forward this to the relevant container depot. The completed form must then be returned to the loading point for the PPECB official's attention.
